AutoMatrix® Snippers+ & Catch-Tray

Illustrated Technique Guide
Attach Catch-Tray from the left side then turn 90° in the instrument axis.

Make sure that the Catch-Tray is properly connected to the Snippers+.

**Important:** Turn instrument and check that there is no gap between Catch-Tray and Snippers+.

Gap leads to malfunction of the Snippers+ and Catch-Tray cannot prevent clipped loop pieces from the oral cavity.
Clip any part of the projecting end of the AUTO-LOCK LOOP.

For loosening of Catch-Tray, open Snippers+ as widely as possible.

Pull off Catch-Tray with clipped pieces from the Snippers+.
